

Residential Architects Philadelphia

The architecture of Always by Design is diverse – encompassing cultural facilities, educational institutions, retail spaces, and residences.

What is consistent is our:

1. Providing a highly personalized level of care
2. Responding to specific needs and circumstances
3. Producing innovative, contemporary solutions
4. Shaping spaces that are engaging to users

Since its inception, AxD has sought to create the best possible architectural solutions – regardless of project size or building type. Our smallest project was an aviary addition for a tropical bird – with a shower to simulate a rainforest!

Services offered by AxD include space needs assessments, feasibility studies, code analysis, sustainable design consulting, and architectural design – from concept through completion – for new buildings, additions, renovations and interior fit-outs.

We engage owners, contractors, and trade specialists in creative collaboration, from project start to completion, to achieve inspiring and enduring results.

Prospect House

Contemporary sustainable shore home sleeps eight

House is located on a 50'x100' mid-block plot in Cape May Point, NJ, one of America's oldest seaside resorts. The program for this vacation home was to accommodate eight guests and eventual year-round retirement use – in less than 2,100 sq. ft.

Designed for LEED-Silver certification, multiple goals are achieved within each aspect of the design – starting with the namesake tower element. The prospect tower alludes to turrets of earlier Queen Anne style houses on the Point and provides a treetop-level migratory bird observatory, while serving as a passive cooling chimney for the entire house.

Awards: 2013 Honor Award from Society of American Registered Architects (SARA) Pennsylvania Chapter, and 2013 Merit Award from the American Institute of Architects (AIA) New Jersey Chapter

The Goal: Create a landmark LEED certified coastal vacation home

Sustainable design features included a vegetative ("green") roof, rainwater harvesting, and EnergyStar certification for this new home at Cape May Point. The habitat-style-garden is attractive to migratory wildlife and utilizes indigenous and drought-tolerant plants.

Awards: 2013 Honor Award from Society of American Registered Architects (SARA) Pennsylvania Chapter, and 2013 Merit Award from the American Institute of Architects (AIA) New Jersey Chapter

How we work

Responsiveness

We approach each architectural project with a “beginner’s mind” – not with what worked for someone else under different circumstances. We are responsive to each project’s specific needs and unique opportunities. We tailor architecture to fit each situation.

Accountability

The intimate studio environment of AxD allows the principal Ed Barnhart to function as the primary designer and go-to "point person" for each project. This assures continuity of communication, design direction, and quality control.

Hands-on Experience

We take a very hands-on approach to our work. Our first project was a small vacation residence gatehouse – designed and erected by the project team. All of our architectural design, detailing, specifications and construction supervision are done in-house.

Satisfaction

Our business is founded on referrals and repeat clients and collaborators. We work to make every relationship a success and the basis of a long term relationship.
